## **DETAILED ACTION**

### ***Claim Objections***

Claims 1-8 are objected to because of the following informalities:

In claim 1, the second instance of the recitation "a length drilling pipe" should be changed to "the length drilling pipe". Claim 2 depends from claim 1 and is likewise objected to.

The preamble of the claims 4, 5 and 8 should be changed to be commensurate with the base claim.

In claim 6, the recitation "the drill cutting bit" in line 6 lacks antecedent basis. Claims 7 and 8 depend from claim 6 and are likewise objected to.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Sandstone, U.S. 1,899,728.

Sandstone discloses a hammer (3, 5, 8, 11) having a threaded upper end attached to the cap (1) inherently capable of being coupled to a length of drilling pipe

through a back head or threaded coupling, a downward drill cutting bit (2), a tubular back cutting bit (1,20) extending from and permanently threadedly engaging a back head (26) or valve body (the claim lacks limitations precluding the comparison), the back bit having a plurality of upwardly extending cutting teeth (20; col. p. 1, lines 76-82) coupled to an upper end of the hammer casing.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Monroe, U.S. 3,399,741 teaches use of wireline and drill pipe supported jarring devices.
